Welcome to the Cloud

Benefits of a Cloud Phone System

- Easy installation. Dramatically less downtime during your transition.

- It's a unified communications platform. Utilize the new mobile apps to let employees work remotely while still being able to track phone calls.

- Flexibility for remote teams. Make and take calls from your mobile device, tablet, or desktop computer.

- Better scalability. Much easier to add phones or even whole sites to a cloud system.

- It's more secure. Every cloud system is protected by a firewall that only allows traffic from trusted IP addresses.
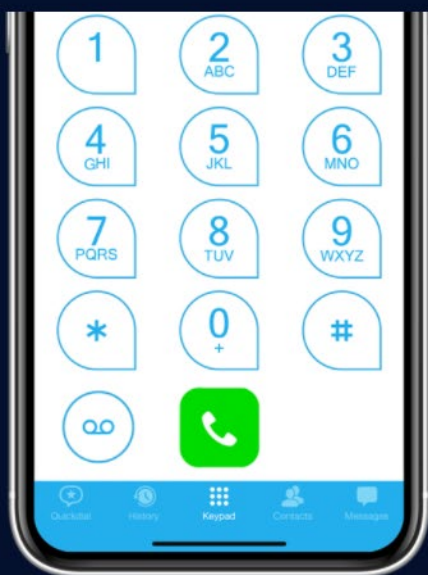

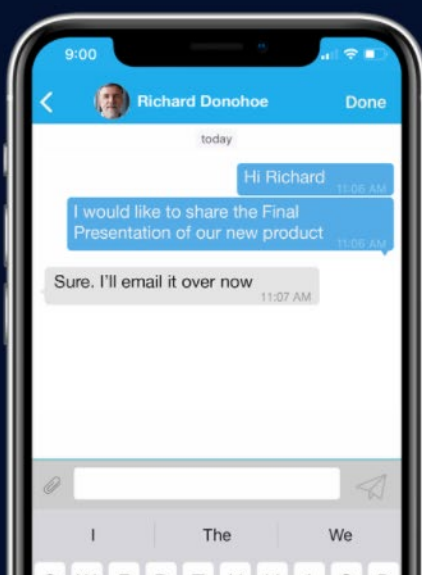

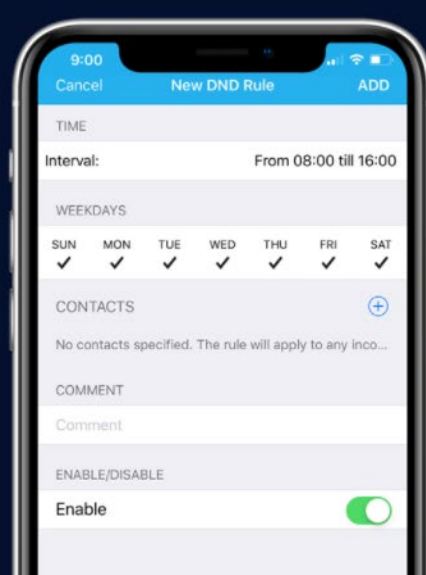

Elegant and Easy to Use Deskphones
